## - Service charges for travel insurance and luggage insurance

For further details on each of the categories above, please consult the UN website<sup>1</sup>.

**A "typical week"** should be understood as one which is representative of the period as a whole. If it is difficult to identify a typical week because weeks differ too much, then the information should be provided for the first week before the end of the reference period that is not affected by holidays or other special circumstances (e.g. illness) (see page 76 in this document). Rare but regular expenses (e.g. cost of insurance), should be averaged so to fit the weekly scale.

Variable can be collected and submitted either at the household or personal level.

It can also be collected and submitted at both household and personal level.

## PC040T4/HC050T4: Regular savings (in a typical month)

| Domain/Area               | Consumption   |
|---------------------------|---|
| Transmission type         | Early and regular   |
| Reference period          | Typical month   |
| Unit                      | Individual level - each current household member aged 16 and over or  |
|                           | selected respondent (where applies)                                   |
| <b>Mode of collection</b> | Personal interview (proxy as an exception) or registers if applicable |
| Values                    | 1 - 999999.99 amount  |
|                           | No savings  |
| Flags                     | 1 Filled  |
|                           | -1 Missing  |
|                           | -7 Not applicable (HB010\neq 2017)                                    |
|                           | -8 Not applicable (Variable not collected)                            |
|                           |   |

## **Description**

The aim of this variable is to capture how much a respondent manages to save in a typical month. The purpose of the savings is not relevant for this variable, for example savings on behalf of others are included.

**Saving represents** that part of disposable income that is not spent on final consumption goods and services.

A <u>"typical month"</u> should be understood as one which is representative of the period as a whole. If it is difficult to identify a typical month because months differ too much, then the information should be provided for the first month before the end of the reference period that is not affected by holidays or other special circumstances (e.g. illness) (see page 76 in this document).

Variable can be collected and submitted either at the household or personal level.
